Notice of Non-Responsive Amendment

A. Vortman

Anatoly Vortman  
Primary Examiner  
Art Unit: 2835

## DETAILED ACTION

### *Election/Restrictions*

1. The amendment filed on 10/07/05 canceling / amending all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The newly presented claims are not readable on the elected invention because claim 12 as amended does not recite features of Specie II, at least in part, because it lacks the recitation of “a conduit coupled to the hot region” as was required by original claim 12. The claim also does not recite a “liquid cooling system”. The new claims also recite features pertained to non-elected species. For example, claim 19 recites: “a second coolant pathway”, which is not within a scope of the elected Specie II. The Examiner would like to point out, that if Applicant elects a particular invention with specific features and concurrently amends / adds claims, the new claims must include all of the features and be strictly within a scope of the elected claims (i.e. claims 12-15). In the instant situation the new claims do not read on elected invention of Specie II.

Further, contrary to the Applicant’s arguments that “Claim 12 as originally submitted and as currently amended pertain to the use of one electron conducting material element in the heat transfer unit” (see p. 10 of the amendment filed on 10/07/05); the original elected claims 12-15 do not recite any “electron conducting material”.

2. Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is

longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
